

# ATTENDANCE TRACKING

Measure the flow of delegates at your event with our attendance tracking software. With easy-to-use technology, you can keep track of your delegates throughout your event

## Attendance Tracking.

# Track, monitor, report and manage

Real-time attendance management and insights. For your on-site audience: Scan from your own device; create self scanning stations or allow attendees to self check-in. For your virtual audience reporting is available on livestream viewers and movement on the platform. Measure focus for remote attendees using live engagement features specific to the content.

Enable immediate records of attendance for everything from safety, catering or CPD, sponsored and mandatory sessions. Generate, analyse and respond to statistics at any time, instantly... also great for digital passports and competitions.

---

## Track your delegates throughout the event

Track, record and report on attendance information for sessions, events and headcounts. Control who can attend via smart profile filters.

- Allows staff to scan badges via the Track App
- Optional attendee self check-in via event app
- Create attendee entry rules for controlled sessions
- Participation reporting for remote audience

---

## Uses staff devices

The Elements Track app is available to staff using Apple or Android devices. Use device camera to scan codes or manually select from attendee list.

- The easy-to-use Track app turns staff devices into a badge scanner
- Cost effective with no need for hired equipment
- Works offline and syncs when connection becomes available
