

February: Agenda Session and Personal Agenda Page Re-design and Additions to the Delegate Calendar

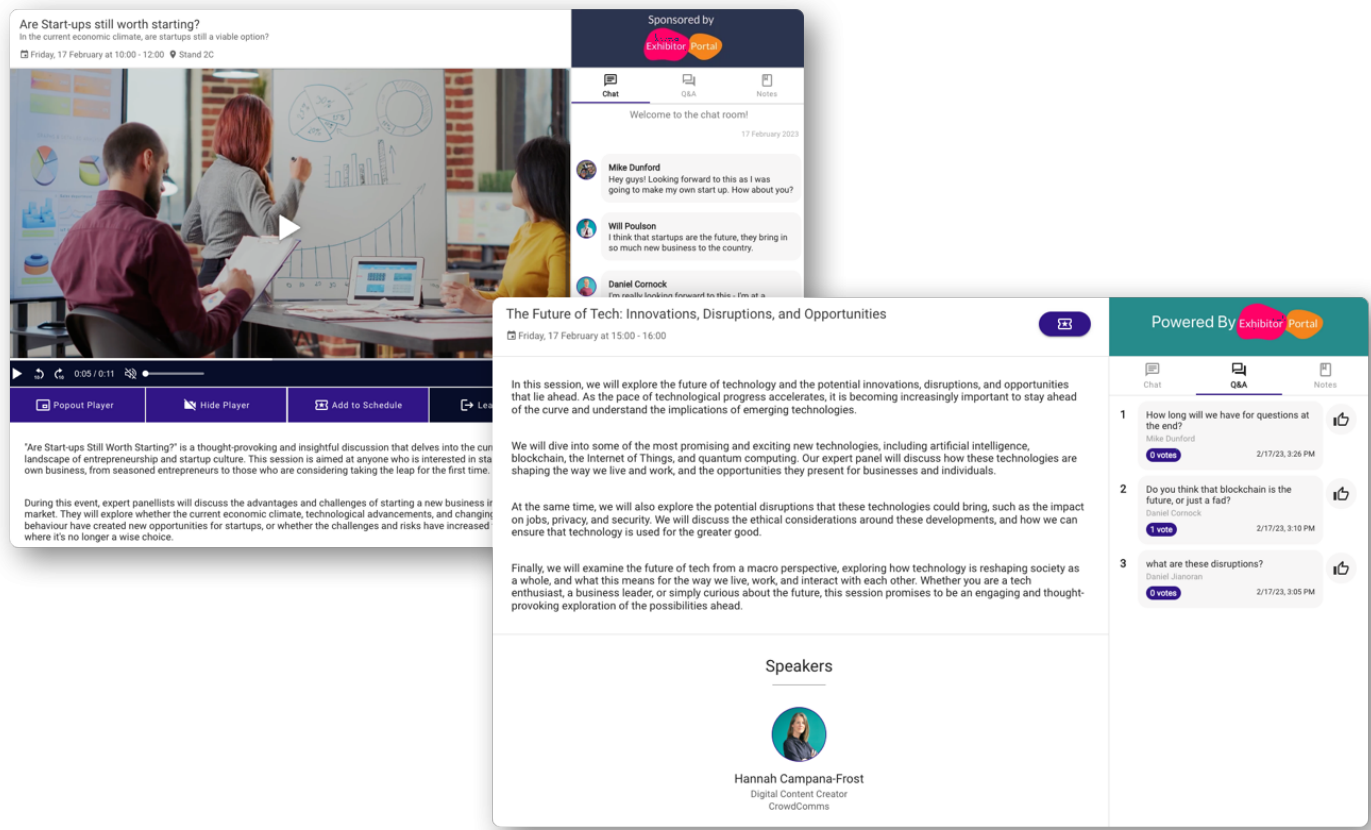

This month is all about design. Since we released the shiny new dashboard a few weeks ago, we thought we'd also freshen up the look and feel of some of the platform features.

We now have a new Agenda Session page, and the Personal Agenda pages have also had a refresh.

We have also added a convenient feature that will enable your delegates to add their scheduled meetings and favoured sessions to their chosen calendar, so they will never have to miss anything.

Let's take you through the details!

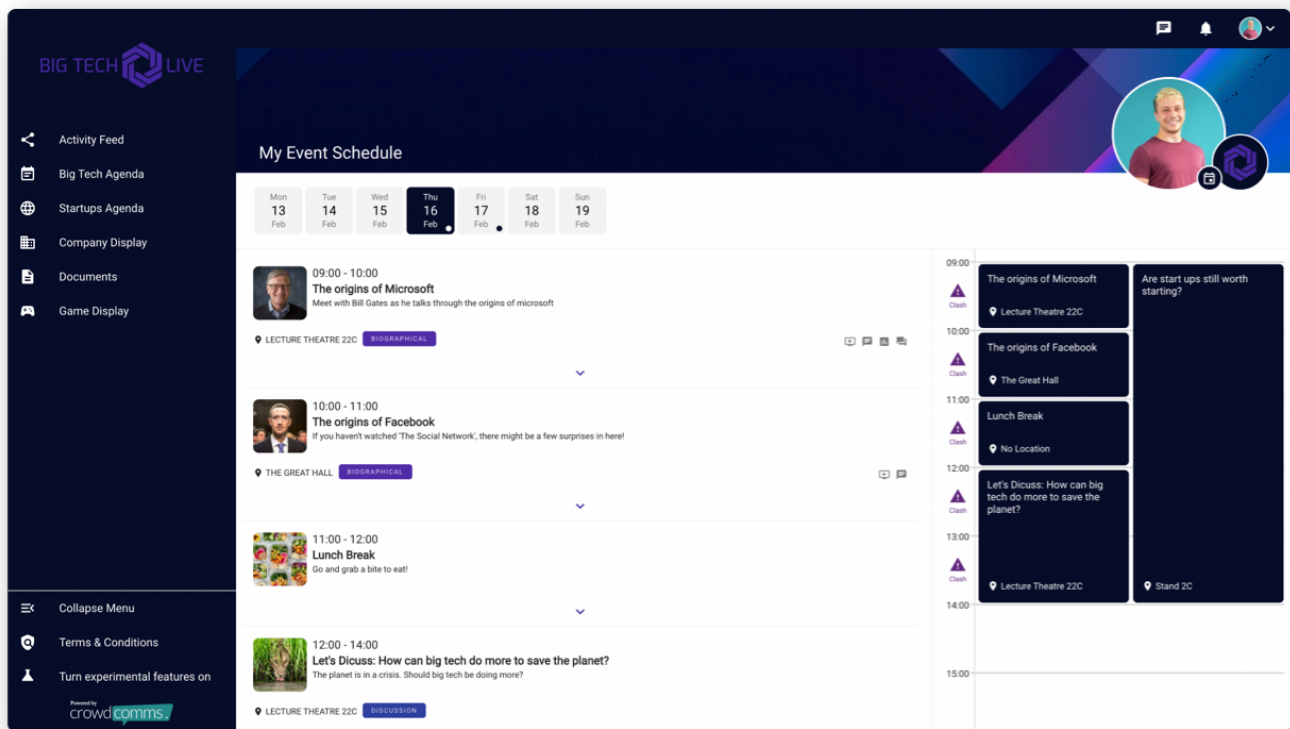

Agenda Session Re-design

The Agenda Session page is the heart of the platform. It is the most crucial feature, and without it, the platform won't be able to fulfil its purpose. Due to its importance, we have decided it deserves a design lift. The design change will include the following:

- Being able to add the engagement panel on non-content sessions
- Being able to add a sponsor logo, which will appear as a banner at the top of the page
- A wider video player
- Full-height engagement panel
- Re-designed default poster for live streams
- Re-designed login message for live streams on public apps
- Re-design of the people's list on the session
- Re-design of the document's list on the session
- Improvements to the chat feature

Personal Agenda Re-design

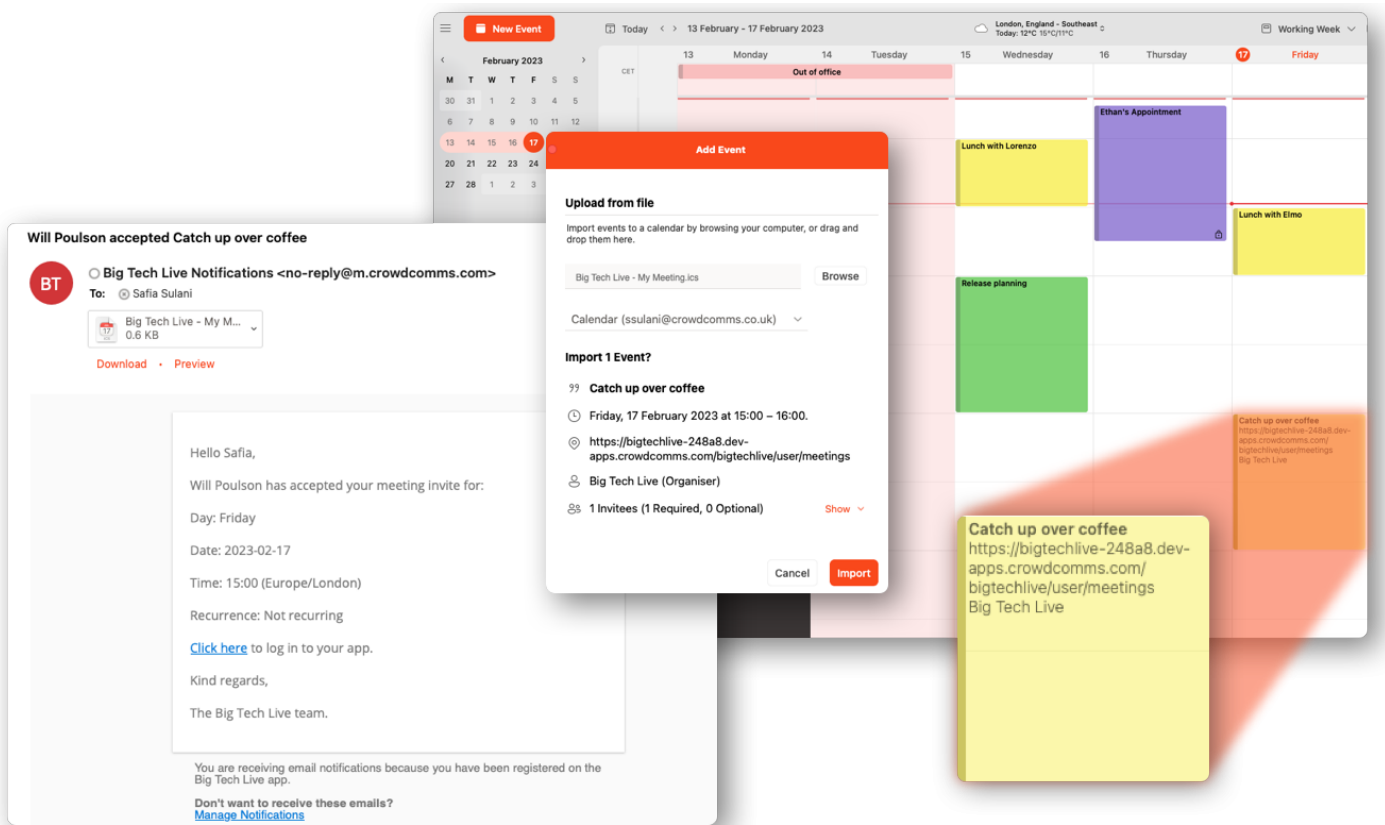

The Personal Agenda page has also been given a facelift. Not only to the design but the functionality has also been extended to include delegates' upcoming meetings and the event organiser's managed agendas.

The next time your attendees download their event schedule, they will be able to add *all* of their meetings, favoured sessions & organiser's managed sessions to their device's calendar and never have to miss anything even when they're not on the app.

The best way to experience the changes is to see the new page in action, so please play around with it once it is released!

.ics Attachments with Email Notifications

We're closing with a massive benefit for your attendees! .ics file attachments will be included in all meeting and favoured session email notifications, meaning your delegates can easily add in-app them into their chosen calendar. This way, even when away from the app, they will never miss any meetings or sessions.

Revision #1
