

Smart Sessions

Smart Sessions is revolutionising the way we network at virtual and hybrid events. Offered as part of the CrowdComms' industry-leading event platform, it recreates the serendipity of in-person networking, online. Dedicated networking rooms give attendees intuitive and engaging spaces to effortlessly join video conversations with other delegates and watch event live streams together once again. Networking rooms can be organised by topic, industry, attendee type, or any other way that helps your attendees connect with the right people – transforming the experience of attending a virtual or hybrid conference, exhibition, company get-together, member meeting or awards show. Smart Sessions also unlocks a range of sponsorship opportunities, from branding to announcements and advertising content. We've set out a user guide below to get you quickly up and running. If at any time you require further support or assistance, please get in touch with your CrowdComms' Account Manager or Support Specialist, who will be happy to guide you through the process.

Browser Requirements

Browser Requirements

Browsers must support WebGL. Browsers supported by the WebGLRenderer are:

- Firefox 15+
- Chrome 11+ (Recommended)
- Edge 99+
- Opera 19+

If you find that you still have trouble after checking the above, then please check [here](#) to see if your browser settings are also compatible.

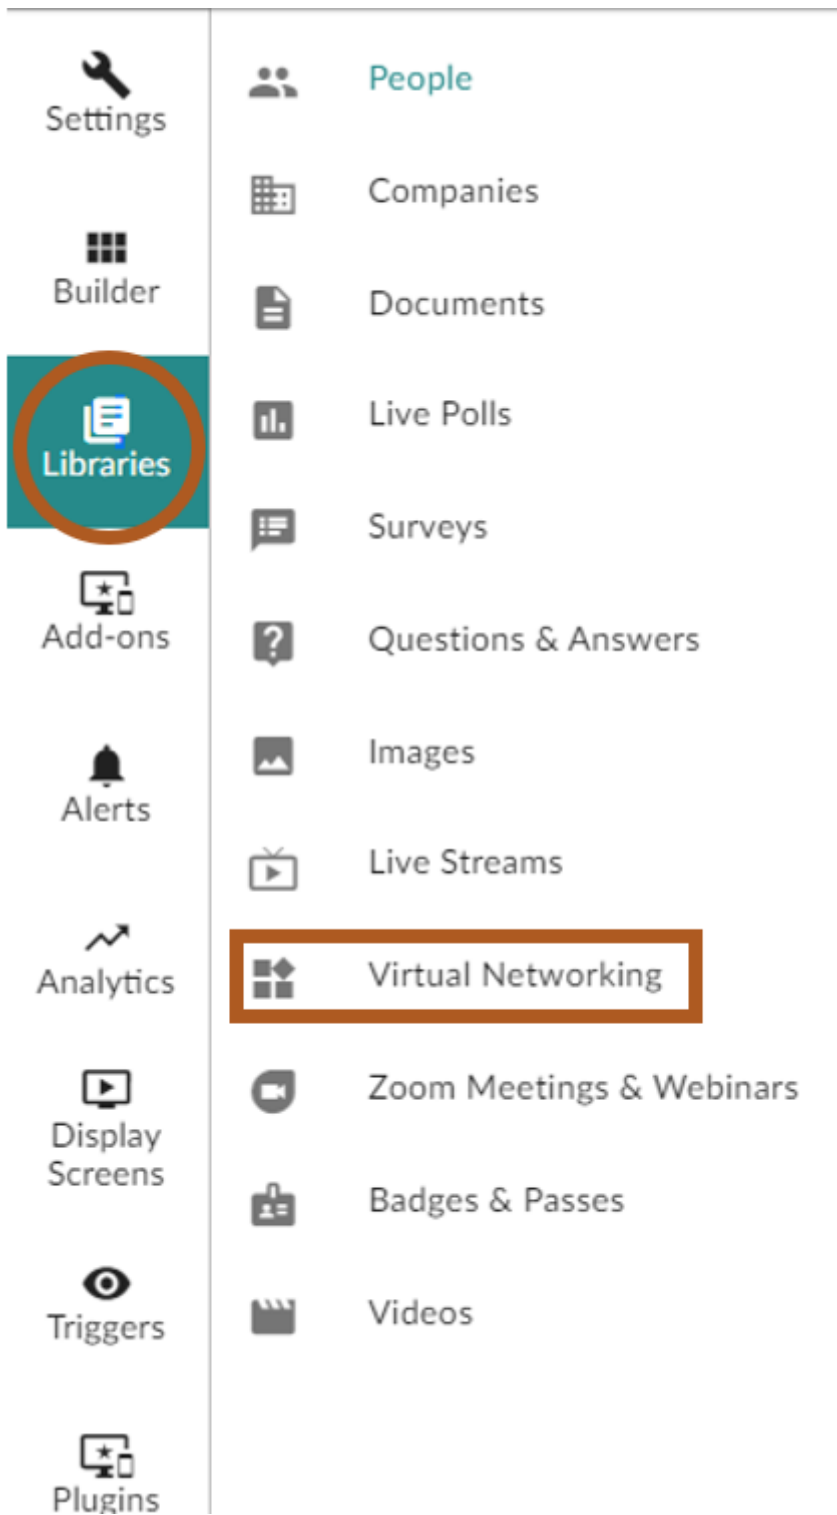

Note: Safari is not currently supported.

Setting up a Networking Room in the CMS

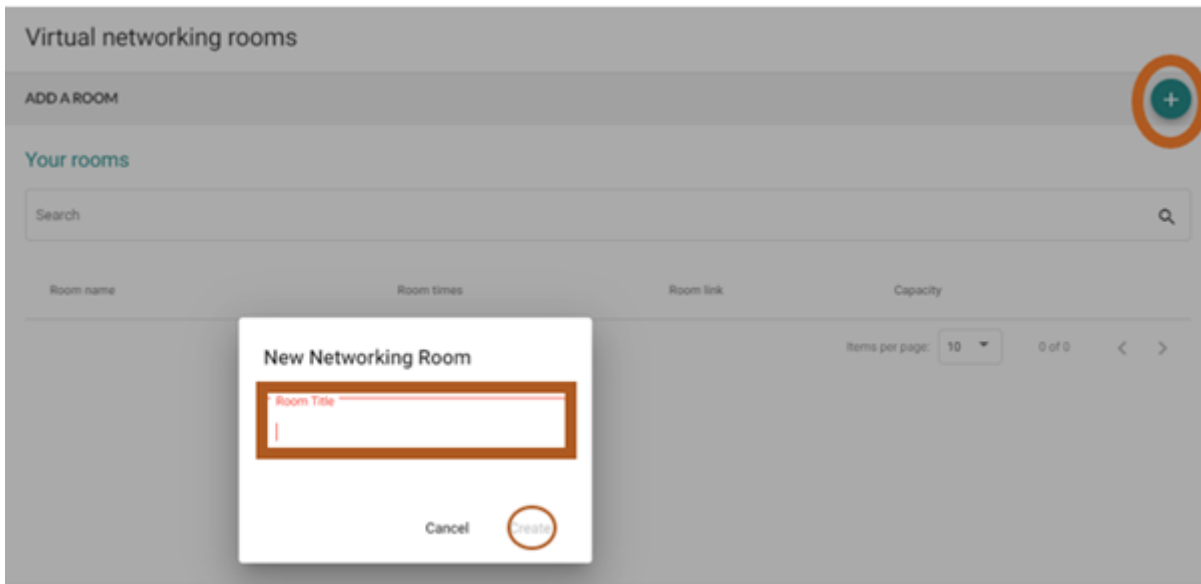

Setting up a Networking Room in the CMS

To get started, you'll need to set up a virtual networking room in the CMS. Once all the elements for this are in place, your attendees will use this space to watch live streamed content and interact with each other.

1. Log into the CMS with your credentials.
2. In the Dashboard, select the Event App that you would like to add virtual networking to.
3. Click on 'Libraries' in the left-hand sidebar.
4. A secondary menu will appear to the right. Click on 'Virtual Networking'.

5. To add a virtual networking room to your Event App, click on the '+' button on the top right-hand side of the screen.
6. A pop-up window will appear, inviting you to create a title for your room
7. Once you have filled in the title field, click 'Create' and you will be taken to your room's main edit page.

8. TOGGLE ON the 'Show in Virtual Networking module' to make the room visible in the Event App.
9. You can also fill in the description field to provide more information for your delegates.
Please note: This field has a limit of 240 characters.

Visibility

☒ Show in Virtual Networking module

Room Title

Room Title

Training Guide

Description

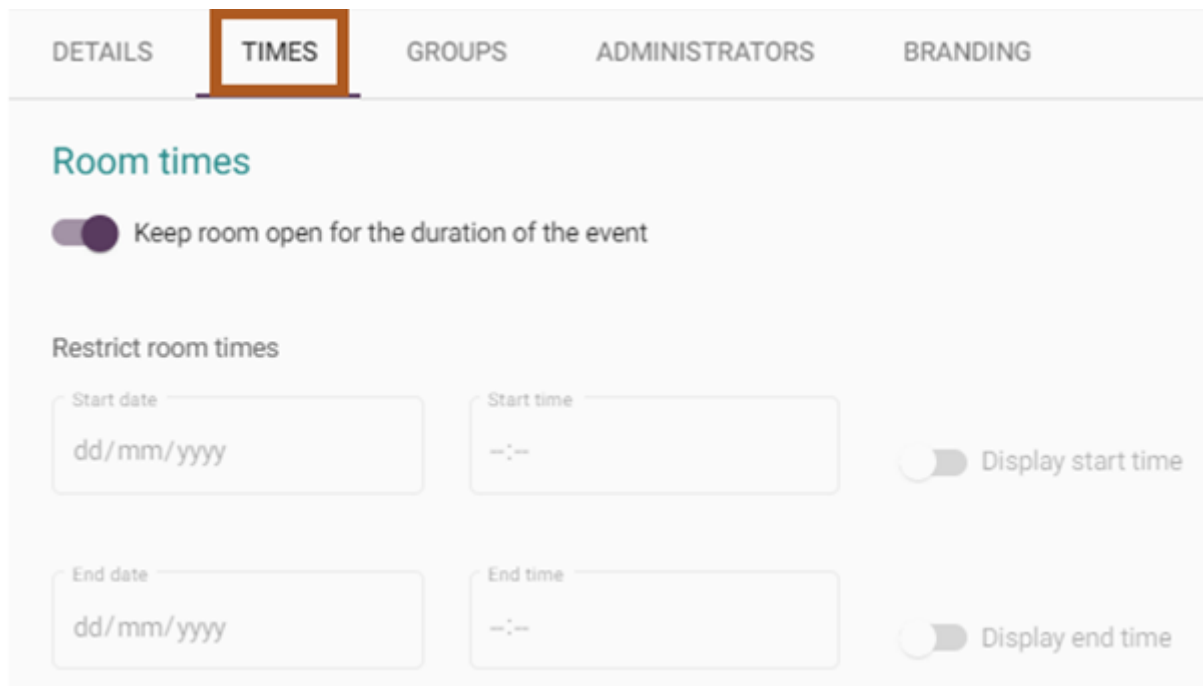

Description

0 characters out of 240

10. Below the description field, you can set the 'Room Capacity' to admit a certain number of participants. The room limit is set to 300 users. If this capacity is reached, a message will appear advising users that the room is full.

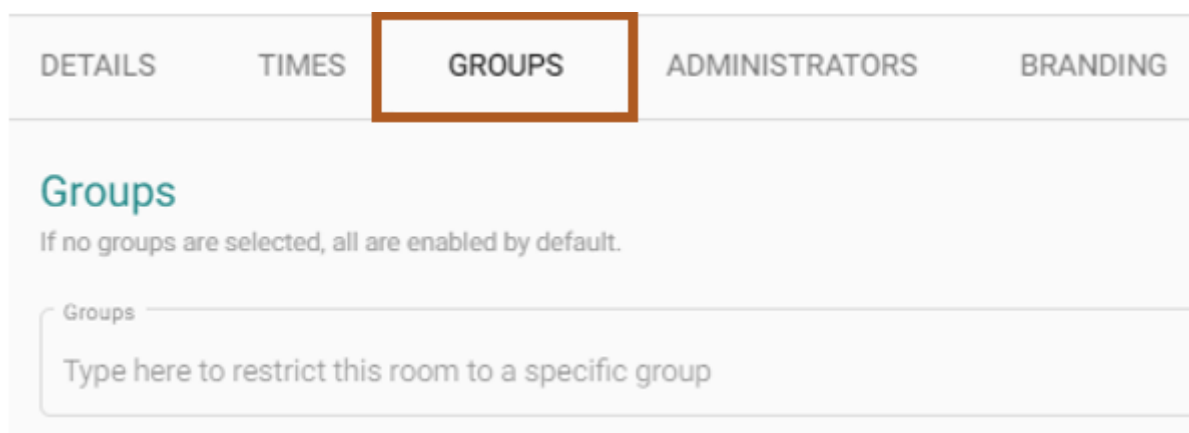

11. Head on over to the 'Times' TAB at the top, to edit the room opening times to fit your requirements. **By default, networking rooms are open for the duration of your event.** If

users attempt to enter rooms outside of your selected times, they will see a message informing them that the room is closed.

The screenshot shows the 'TIMES' tab selected in a navigation bar with options: DETAILS, TIMES, GROUPS, ADMINISTRATORS, and BRANDING. The main content area is titled 'Room times' and features a toggle switch labeled 'Keep room open for the duration of the event'. Below this is a section titled 'Restrict room times' containing four input fields: 'Start date' (format dd/mm/yyyy), 'Start time' (format --:--), 'End date' (format dd/mm/yyyy), and 'End time' (format --:--). To the right of the 'Start time' and 'End time' fields are toggle switches labeled 'Display start time' and 'Display end time' respectively.

12. If you go to the 'Groups' TAB at the top, you can select which groups have access to your networking room. **Please note:** Groups must be set up through the 'People Library' in the CMS. Please click [here](#) for instructions on how to set up your groups.

The screenshot shows the 'GROUPS' tab selected in a navigation bar with options: DETAILS, TIMES, GROUPS, ADMINISTRATORS, and BRANDING. The main content area is titled 'Groups' and includes the text 'If no groups are selected, all are enabled by default.' Below this is a large text input field with the placeholder text 'Type here to restrict this room to a specific group'.

13. To customise the look of your room, you'll want to go to the 'Branding' TAB at the top. Here, you can upload a background, logo, poster image and change your room's colour scheme.

Note: Background images should be 4000 x 4000 pixels in size. Your logo can be any size and the poster image should be 1920 x 1080 pixels with an aspect ratio of 16:9.

Note:

Changing the primary colour will affect:

- The 'OFF' state of the microphone and video

- The 'OPEN' state of any modal, for example: Settings and People Search, the colour of a user's bubble, the colour of the bubble that users are in, users shown on the mini map in the room and TAB titles, e.g., chat.

Changing the secondary colour will affect:

- The 'ON' state of the microphone and video
- The 'CLOSED' state of any modals

The screenshot shows the 'BRANDING' tab selected in a settings interface. The tab is highlighted with a brown border. Below the tab, there are three main sections, each with a title and a description, and a corresponding upload area:

- Room Logo**: Transparent PNG. Below this is a large white box with a small image icon and the text 'Upload logo'.
- Room Background**: Please upload a 4000x4000 pixel image. Below this is a large white box with a small image icon and the text 'Upload background'.
- Poster Image**: This will appear in the networking module. Below this is a large white box with a small image icon and the text 'Upload poster'.

At the bottom, there is a section titled **Colours** with two color selection controls:

- Primary colour**: A circular color picker followed by a text input field.
- Secondary colour**: A circular color picker followed by a text input field.

14. Click 'Save', which will automatically take you back to the main menu displaying the virtual networking rooms.

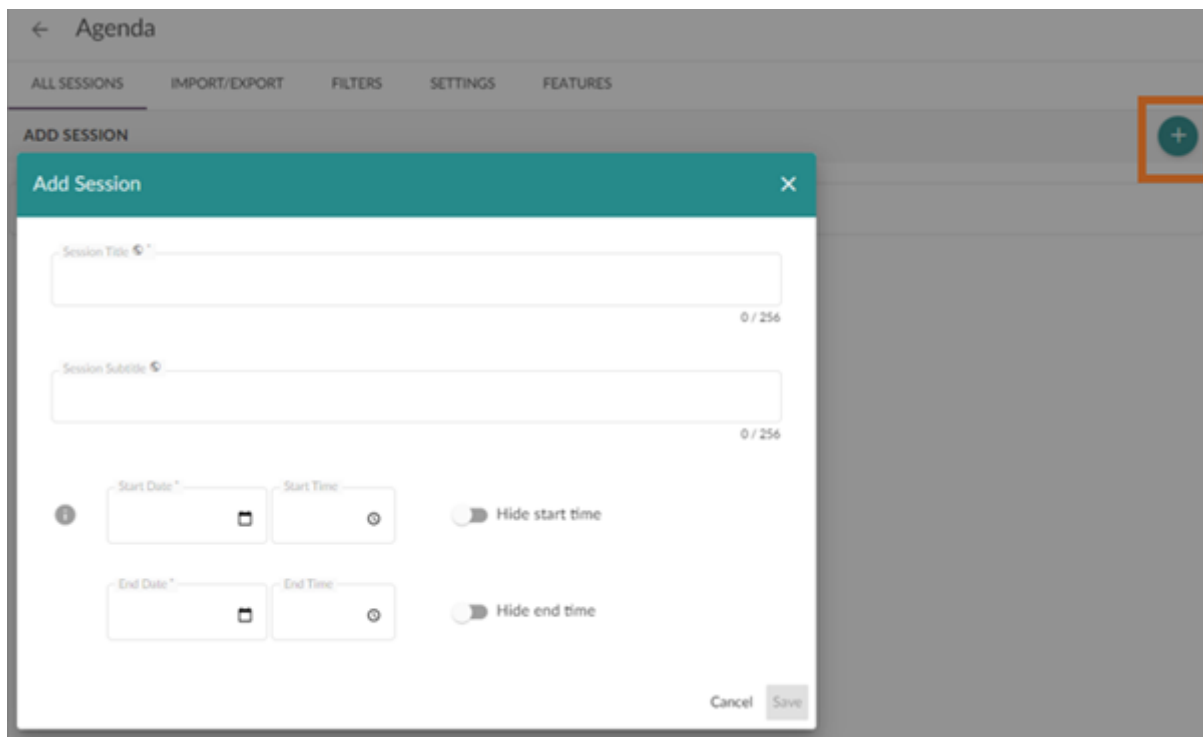

Note: The 'Administrators' TAB currently offers no functionality to users. This feature will be developed in a future version.

Linking your room to an Agenda session & Joining a room

Linking your room to an Agenda session in the CMS

If you do not already have an Agenda module set up, check out our [Agenda guide](#) to get you started.

1. In your Agenda module click on 'Add Session' or choose one from the list below if your agenda session already exists.
2. A pop-up will appear inviting you to populate your session title, subtitle, and times as appropriate.

The screenshot shows the 'Agenda' module interface. At the top, there's a navigation bar with tabs: 'ALL SESSIONS', 'IMPORT/EXPORT', 'FILTERS', 'SETTINGS', and 'FEATURES'. Below this, a 'ADD SESSION' button is highlighted with an orange box. A modal form titled 'Add Session' is open, featuring input fields for 'Session Title' and 'Session Subtitle', both with a character count of '0 / 256'. It also includes date and time pickers for 'Start Date', 'Start Time', 'End Date', and 'End Time', along with toggle switches for 'Hide start time' and 'Hide end time'. At the bottom of the modal are 'Cancel' and 'Save' buttons.

3. Click Save, which takes you to a new agenda session edit page/panel.
4. Fill in all the agenda TABS as appropriate. **Please note:** Only the 'Embed' TAB will have a direct impact on your networking room.
5. Click on the 'Embed' TAB, which brings up the function options for your session.

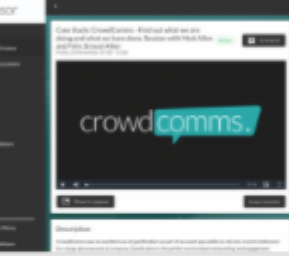

6. In the virtual networking rooms section, on the same page, select the room that you have created.

Select a virtual networking room

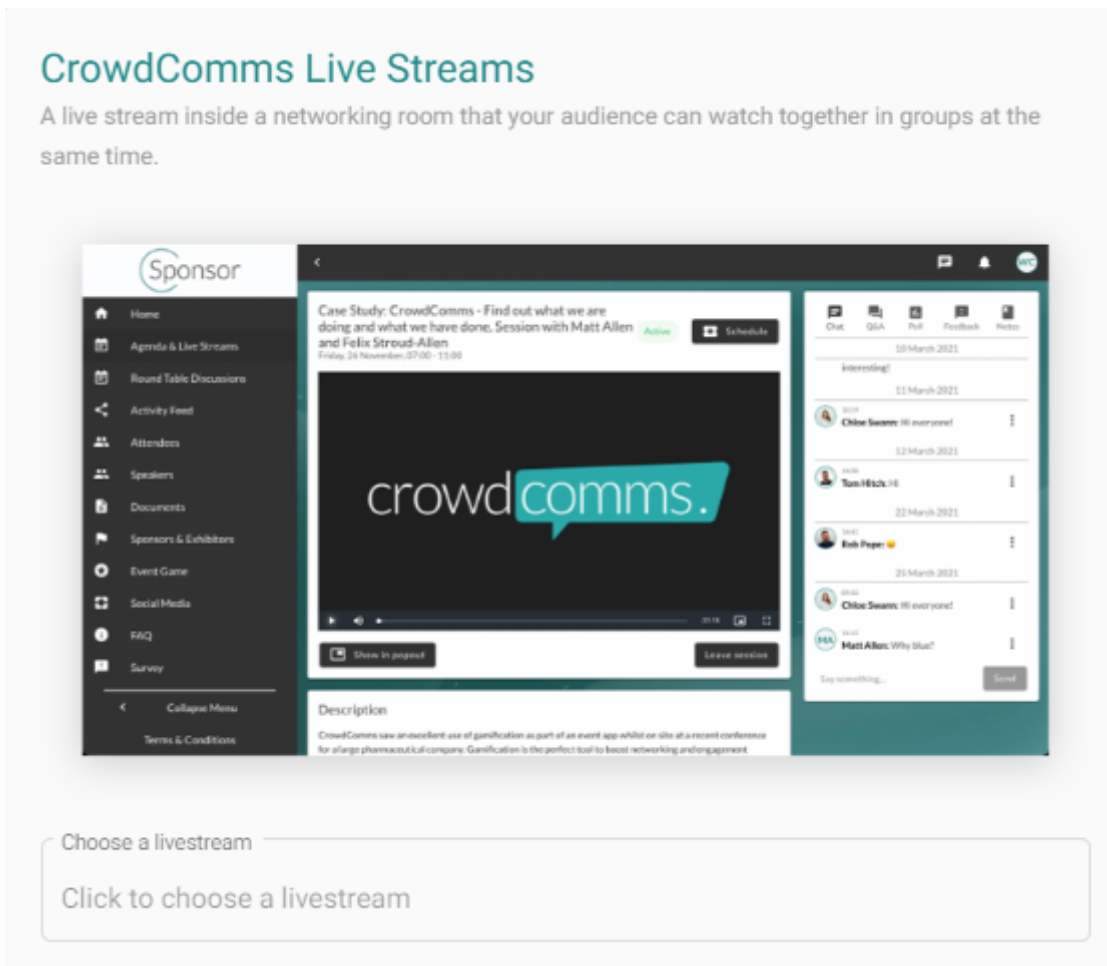

7. Click 'Save' – your room is now linked to your agenda session.

Live Streams & Videos

Live Streams

To add a live stream into your room:

1. Go to Libraries > Videos
2. Upload the video you want to play in the room
3. Go to Libraries > Virtual Networking
4. Select your room and click on the edit icon
5. Click on the Embed TAB
6. Choose your live stream from the drop down menu under "CrowdComms Live Streams"

7. Click Save

NOTE: You can stream the same live stream into multiple rooms

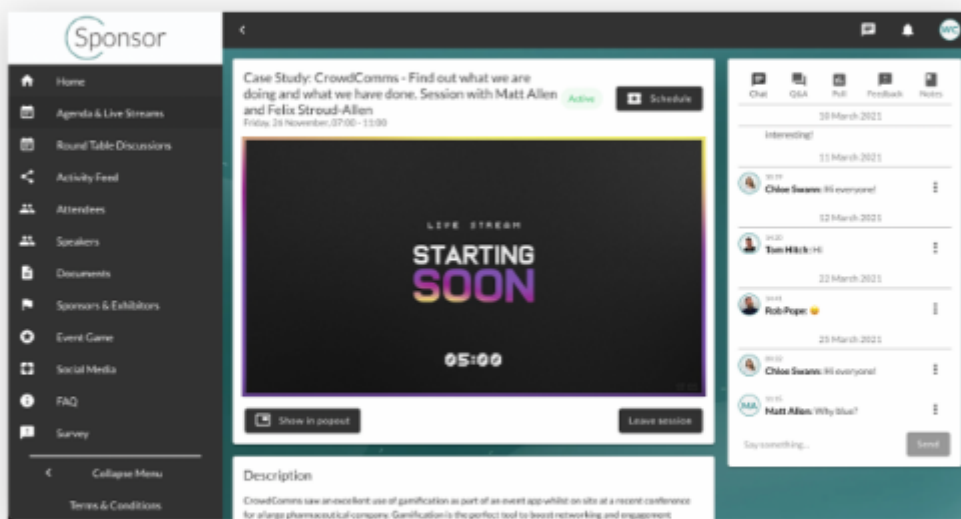

Videos (Simulive)

To add a video into your room:

1. Go to Libraries > Videos
2. Upload the video you want to play in the room
3. Go to Libraries > Virtual Networking
4. Select your room and click on the edit icon
5. Click on the Embed TAB
6. Choose your video from the drop down menu under "Simulive video from library"

Simulive Video From Library

A pre-recorded video that will broadcast simultaneously to the networking rooms audience, so they can watch it together

Choose a video

Something

7. Click Save

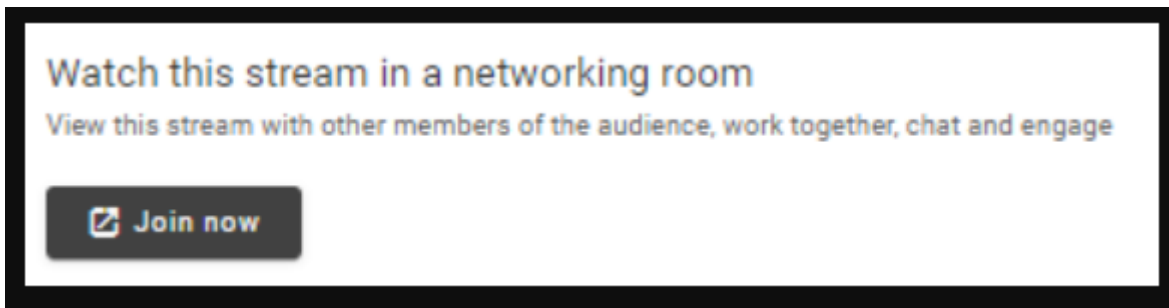

The video you have selected will now play in your room.

NOTE: You will need to interact within the room once for the video to start

Joining a room

Joining the room via an Agenda Session

1. Click on the 'Agenda Session' you have created (you will then see an option to watch the live stream in your networking room).
2. By clicking on the option of 'Join now' in the bottom left of the screen this will open a separate window for your room.

Screen Sharing

Users can share screen whilst in a bubble by selecting the “Share screen” button.

The user who is screen sharing will be noticeable by a highlighted border around their video screen.

Shared screens can be viewed in full screen.

NOTE: Sharing a screen will overtake any LIVE stream in the room.

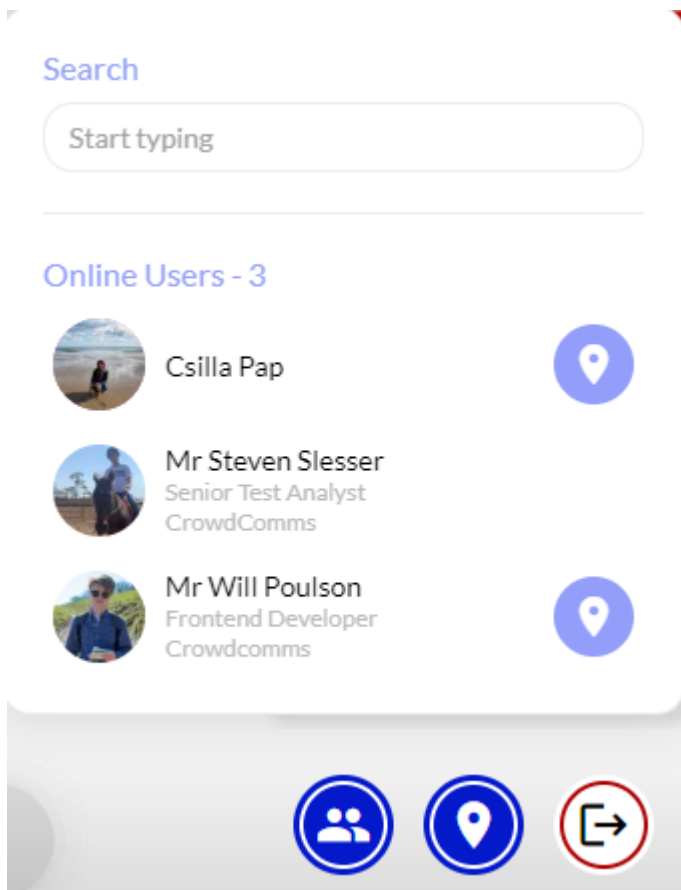

Location Map

Click on the 'location' icon to view a map to pinpoint your current location.

Teleporting

Click on the online users list before clicking on the 'Teleport' button next to the user you wish to travel to. You will then see your avatar teleport across the room arriving near to the person you selected.

Please note: You are not able to teleport while on a call or while in a bubble with other attendees.

Bubble Locking

You can now 'lock' your bubbles to prevent other users from joining your conversation. Simply click on the padlock in the middle of your bubble and this will change the padlock icon to 'closed'.

The closed padlock is visible to everyone else in the room.

To unlock the bubble, click on the padlock again and the icon will change to an open padlock.

You can lock your bubble with 2, 3, 4, 5, 6, 7 or 8 users inside of it. If you are in a locked bubble, you can, however, still leave at any time.

Clearing Users and Chats in a Room Through CMS

Clearing users and chats in a room through CMS

Users can clear users and chats in a room through CMS.

Select the “reset” icon in the Virtual Networking Rooms list for the room you wish to reset. You will then be presented with a pop up where you can select clearing the room and or the chat within the room.

Inactivity

Inactivity

A user will be marked as inactive if:

- If the user hasn't interacted with the app in an hour and they're not in a call, and there isn't an ongoing live stream
- If the user hasn't interacted with the app recently and the browser decides to suspend it as a background task – the browser may do this to free up available resources on the device

NOTE: You will be presented with an inactivity page which will have a link to “re-join” the room

Media Permissions

Media Permissions

Users will be prompted to accept media permissions when first joining the room, if these permissions are rejected then the user will not be able to join the room.

Smart Session Features Table

Smart Session Features Table (Updated 03.05.2022)

Existing Features	In Development	Future Development
One-to-one and up to group of 8 video chat within a bubble	Linking Q&A feature to the room	Enhanced emoji feature in chat
Ability to link live stream to a room	Waiting room feature	Room size options
Ability to screenshare with members of the bubble	User availability status	Linking poll feature to the room
Chat feature with delegates within the room (200 max character in a single chat)	Ability to conduct scheduled meetings within Smart Sessions	Ability for a user to join a Smart Session on mobile and tablet
Blurred background on video call	Ability to tag other delegates in chat	Ability to invite external users into the room
