

Activity Feed

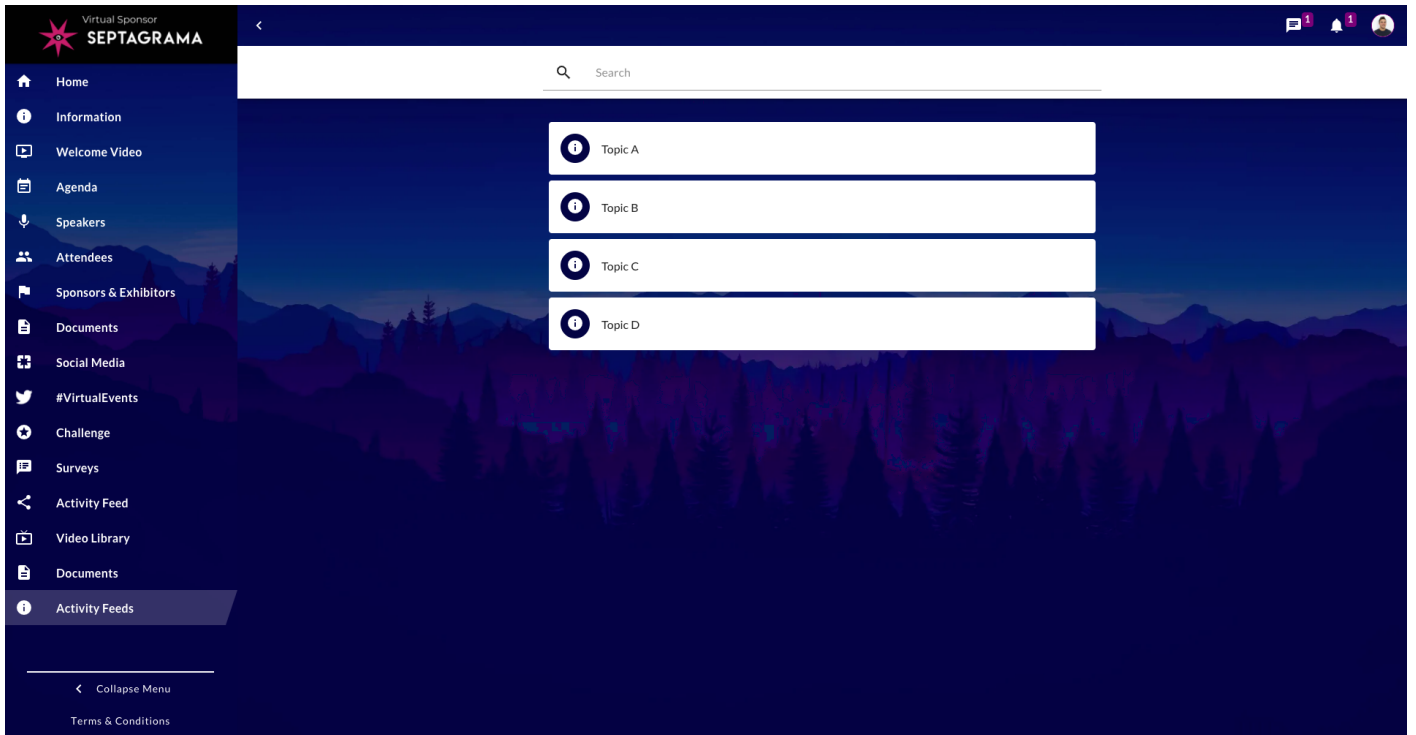

Overview

- The activity feed is an internal social wall where users can post photos, videos and comments
- Users then have the option to scroll through, like and comment on existing posts
- Widely used for internal events where allowing posts to social media is not an option
- Moderation is available to admins
- Create multiple activity feeds for different topics
- Control which groups can see specific activity feeds from the left hand navigation menu

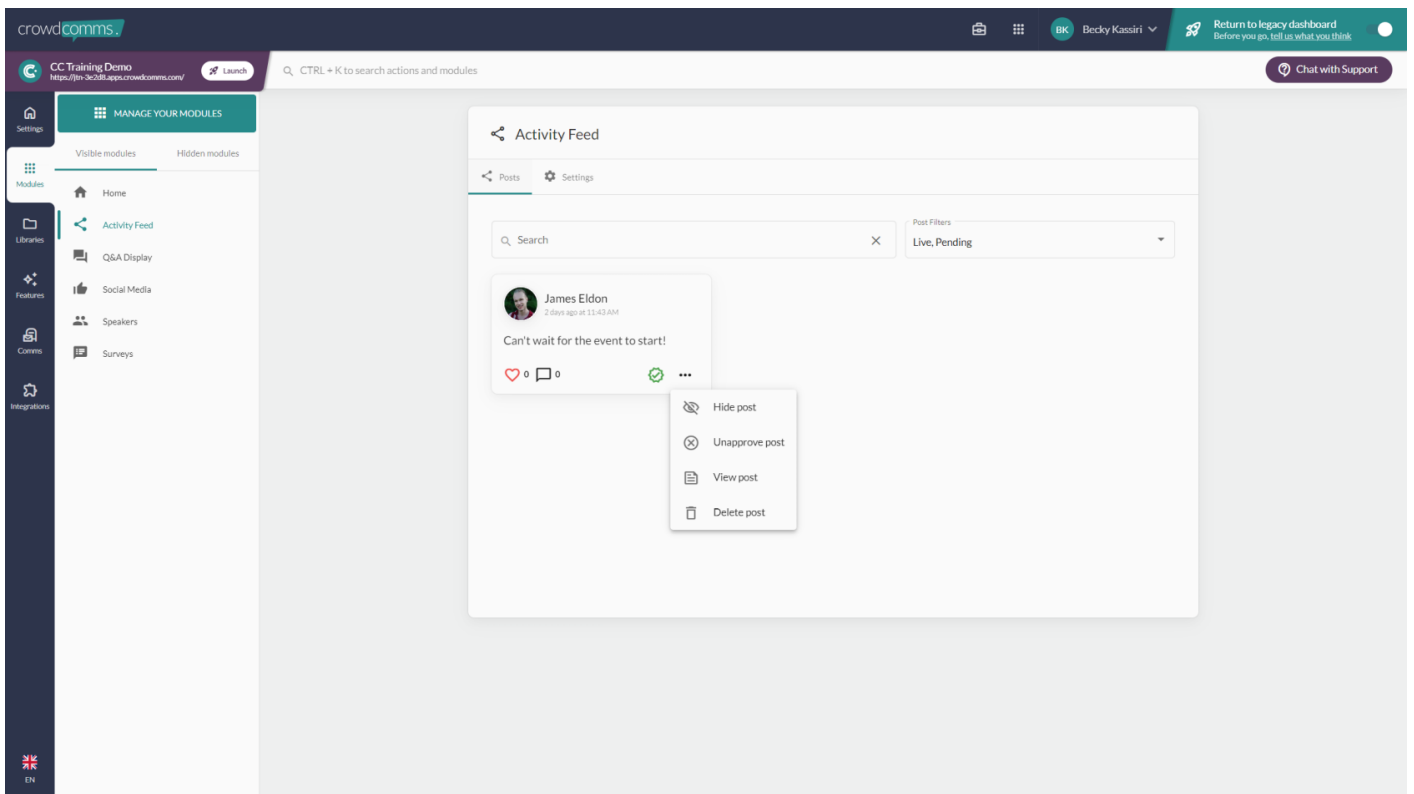

Example activity feed:

Info page to link through to various activity feeds setup for topics:

Moderation available on the CrowdComms dashboard (CMS)

Revision #7
