

Inactivity

Inactivity

A user will be marked as inactive if:

- If the user hasn't interacted with the app in an hour and they're not in a call, and there isn't an ongoing live stream
- If the user hasn't interacted with the app recently and the browser decides to suspend it as a background task – the browser may do this to free up available resources on the device

NOTE: You will be presented with an inactivity page which will have a link to “re-join” the room

Revision #5
