

Session Chat

Overview

- Live chat feed linked to sessions in the agenda.
- Users can add their message within the chat section before, during and after the session finishes.
- Interface includes when chat messages were sent by date and time.
- Works great for live feedback and to gauge how the audience is feeling and what their thoughts are around the session.
- Speakers or admins can engage with the chat feed however we recommend using the live Q&A feature or live polling for direct engagement with the remote audience.
- Chat section is enabled or disabled with simple toggle on / off option in the CrowdComms dashboard (CMS)
- CrowdComms Staff can remove unwanted messages from the chat feed and, if necessary, remove a user from the app.
