

Session Q&A

Overview

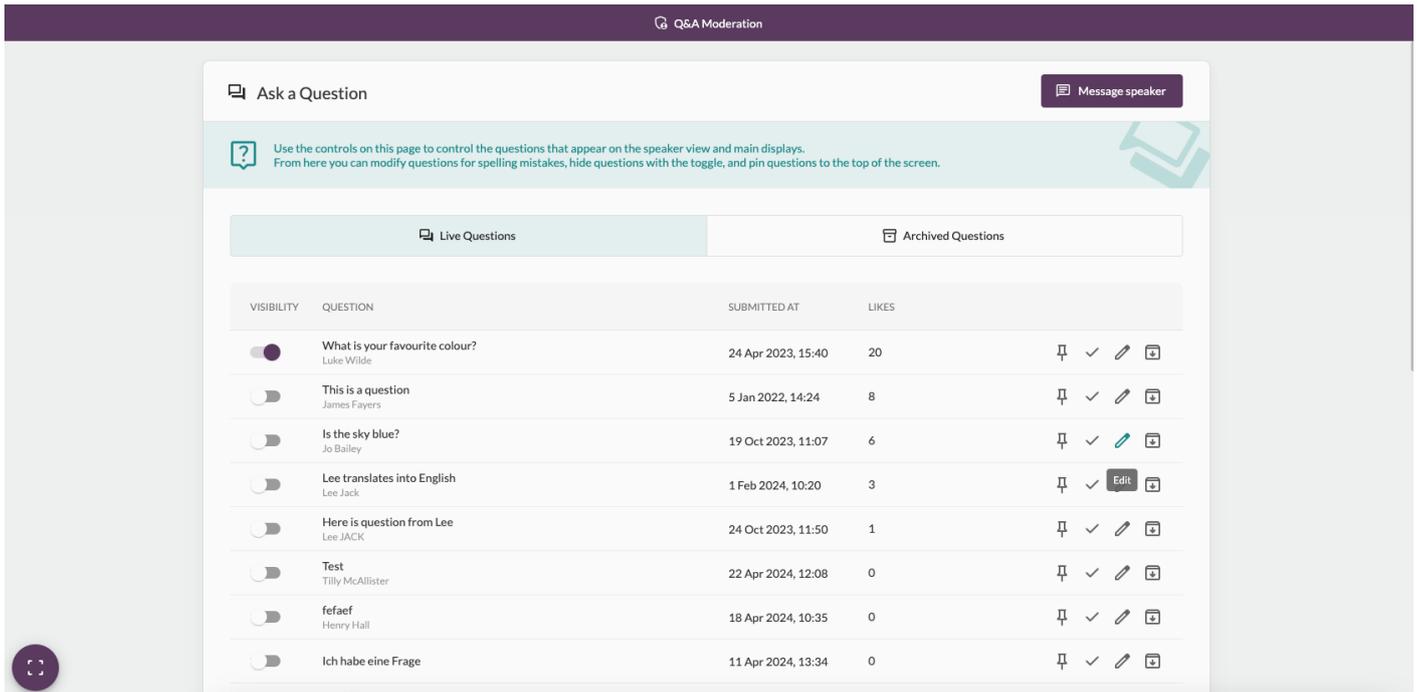

- Allow the audience to ask questions in the lead up and during your session(s).
- Moderation to control what questions are sent to speaker(s) and / or control the questions that appear on the live stream.
- Ability to edit questions before they are sent to speakers.
- Users have the option to vote up their favourite questions once they've been approved by moderation.
- Most popular questions will appear at the top of speaker view and the main live stream view. This allows your speakers to focus their attention on the most popular questions at the allocated time.
- You retain record of all questions asked, giving you the opportunity to distribute answers post event if desired.
- Option to keep questions anonymous or show users name and company next to the question(s) they have asked.

Platform interface, user experience:

Moderation for admins:

Moderation is accessible via URL for remote control. Simple toggle on / off to approve or hide questions once answered.

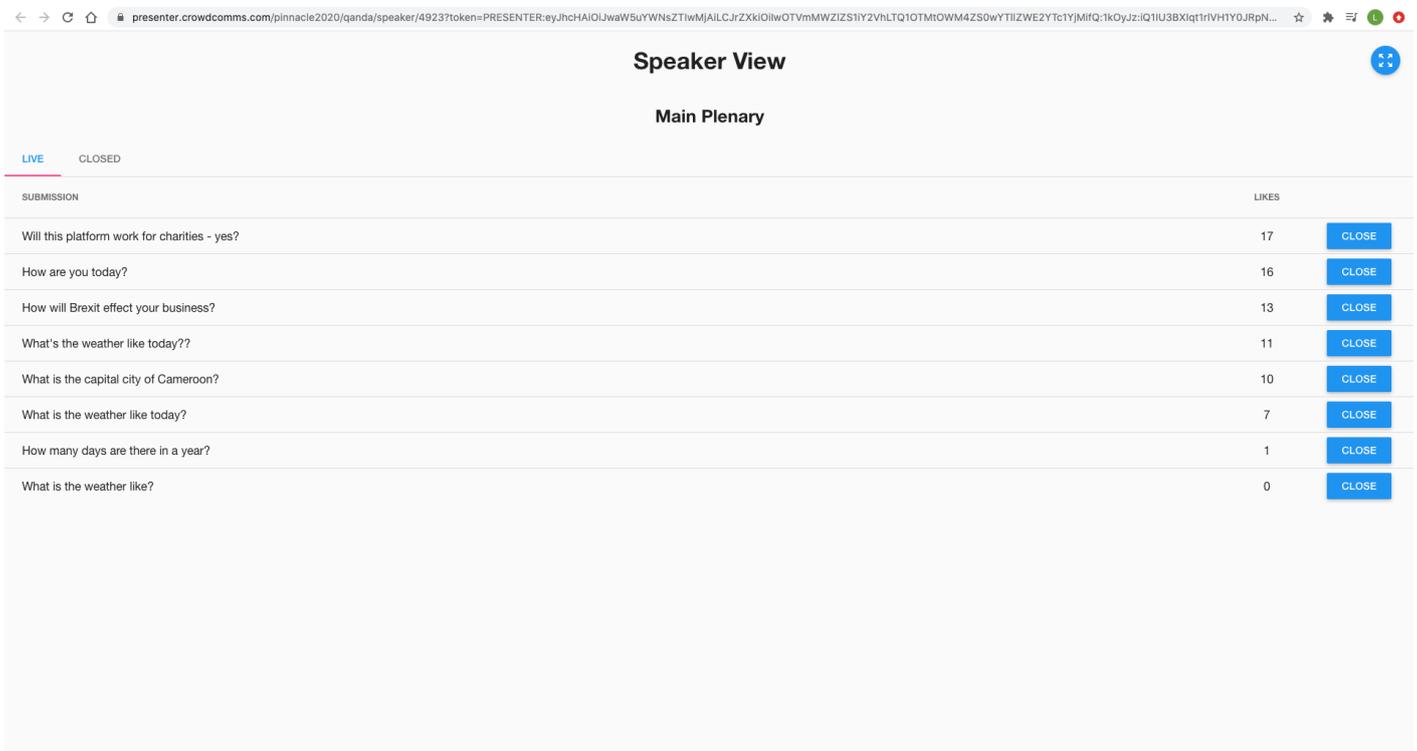

The screenshot shows the 'Q&A Moderation' interface. At the top, there's a 'Message speaker' button. Below it, a help message explains the controls. The main area is divided into 'Live Questions' and 'Archived Questions' tabs. A table lists questions with columns for visibility, question text, submitted time, and likes. Each row has a toggle switch and icons for pinning, checking, editing, and deleting.
