

Virtual events: Generate leads from a virtual audience

Refer to the attachment available in left menu for visuals

Engage with remote audiences and generate high quality leads

Engage with remote audiences and generate high quality leads. Attendees can access customisable company profiles with the ability to contact available reps via chat or encrypted video call. Potential customers also have the ability to leave profile-business cards as call back requests for post event engagement.

Send out reports to your companies detailing interactions from your audience on their booth for them to follow up after the event
