

Badges and Passes (QR Code)

- [Activating and Deactivating Badges & Passes](#)
- [Designing and Editing Badge](#)
- [Importing 3rd Party QR code into CMS](#)
- [Using the QR Scanner and Adding Contacts](#)

Activating and Deactivating Badges & Passes

- Log into CMS with credentials
- Select App
- Click on “Settings”
- Click on “Features” (Scroll down to “Badges”)
- Slide the toggle ON or OFF as required
- Click “Save”

- If the toggle is turned off your client will see the teaser page in the Libraries -> Badges and Passes

BADGES & PASSES

- Digital badges to compliment or replace physical event badges.
- Design badges for each category of delegate.
- Export the CrowdComms QR code into your registration platform or import third party QR codes into our badges.
- Scan delegate badges to collect event contacts.

Speak to your account manager to find out more about this feature...

Designing and Editing Badge

- Click on “Libraries” in CMS
- Click on “Badges & Passes”
- Click on “Add a new badge”

- Fill out fields as required.

(Note: A preview of the badge will display update as you design/edit the badge (Profile picture, job title and company will however not update on the preview))

A screenshot of the badge design interface. The main form is on the left, and a preview of the final badge is on the right. The form has sections for 'Badge Name', 'Header', 'Display Options', and 'Groups'. The 'Badge Name' section has a text input field. The 'Header' section has a large image placeholder and a color selection circle. The 'Display Options' section has four toggle switches for 'Event Logo', 'Profile Image', 'Job title', and 'Company', and a 'Custom Label' toggle. The 'Groups' section has a text input field. The preview on the right shows a badge with the 'crowdcomms.' logo, a profile picture of Lubomir Dvorak, his name, title 'Commercial Director', company 'CrowdComms Ltd.', and a QR code. A 'Create' button is at the bottom right of the form.

1. Badge Name (This can be anything and will only be shown in the list in CMS)
2. The header can be either an image or a colour
3. Select what you would like displayed on the badge; Event Logo, Profile Image, Job title and

Company (Note; the Event Logo displays over the header)

4. If you would like a custom label on your badge, then turn the custom label toggle ON. You will then be able to type in the custom label and the background/text colour of the label
5. Select which group the badge is shown to (People groups determine who this badge is applied to. If a person is 'matched' with multiple badges, the priority of the badge decides which one is displayed.)
6. Click “Create” to create and save the badge.

Badge Name

This is for your reference only and will not display on the badge

Importing 3rd Party QR code into CMS

- Go into the 3rd party registration platform, such as Entegy
- Import the attendee profiles including, their name, organisation, job title and badge reference
- Log into CMS > Libraries > People > Import/Export TAB and download the example template

- Populate the template sheet with the information from the 3rd party import sheet
- Then import the completed file into CMS
- During the import, you may get an error message if an attendee already exists in the app or there is missing information from your template sheet
- Go to the people TAB and you should be able to see all the imported attendees
- You can search for a specific attendee or click “Edit” on any one of them to check and ensure that relevant attendee information is imported
- Check that the QR code ID field is populated with the correct 3rd party code
- Click Save

NOTE: You can also export CMS QR Codes into a 3rd party platform. Please refer to the specific platform’s own guidance.

Logout

- Click on the “Scan” button

Event Connections

 Search

  A-Z

- Allow device access to the camera
- The user can then scan another delegates/attendees QR Code
- If the QR code belongs to a delegate who is registered in the event app, the user will receive a "Successfully Added" message
- A newly added contact will appear on the Event Connections list

Event Connections

 Search

	Will Poulson Senior Frontend Developer	    
	Lee Jack Commercial Director CrowdComms	   
	Kieran Ezzard Content Specialist CrowdComms	   
	Kate Doig Support Manager CrowdComms	   
	James Fayers Content Specialist CrowdComms	   

- The user can then either; call (Voice & Video), email, chat or visit the website of the new contact if they have this information available on the contact card
- The user can search for a contact or reorganise the list either according to recently added or alphabetically
- The user can also delete a contact by clicking on the 3 dots on the contact card and clicking on delete
