

1. Choosing a Template

1. First, you will need to log into your [CrowdComms dashboard](#) (CMS) and input your details.
2. Upon successful login, select the Event App where you want your Home Page to be created.
3. Then click on 'Builder' from the left-hand menu.
4. You will then see the Module tile selection screen appear. Click on the 'Page Builder' option.
5. A pop-up will appear, which will enable you to rename the module.
6. You will then see nine templates for you to choose from. Each template consists of additional variations to give you even more flexibility over your App design.
7. These templates can be broken down into two categories; Home Page templates and Content Page templates.
8. The templates that are on offer are:
 - a. Geneva - *Home*
 - b. California - *Home*
 - c. Sahara - *Content*
 - d. Monsoon - *Content*
 - e. Cornucopia - *Home*
 - f. Iconic - *Home*
 - g. Rio - *Home*
 - h. Dixie - *Home*
 - i. Workspace - *Home*
9. If you hover over each template, you can click on the 'Preview this template' button to see a quick view of your chosen template design before committing to it.
10. Once you've chosen a template and are ready to start building your page, click on the 'Build using this template' button.

ADD NEW MODULE

- Settings
- Builder
- Libraries
- Add-ons
- Alerts
- Analytics
- Display Screens
- Triggers
- Plugins

Add Module

- Activity Feed
- Agenda
- Company Display
- Game Display
- Iframe
- Info Pages
- Maps
- Page Builder

Custom Template Preview

Preview the selected template to get a feel for how your custom page will appear on both mobile and desktop

GENEVA

GENEVA contains a full screen background image that flexes across all devices with interactive tiles for delegates to navigate to any chosen section of the site.

Vertical logo with video

A theme full of impact with space for a large logo running top to bottom, event video, a full screen background image and as many section links as you'd like.

Horizontal logo with video

The same premium theme with just as much impact. Simply with a more traditional logo position in the top left of the screen.

Page Builder

Add a Page Builder module to your app.
Add a module name or select save to use 'Page Builder' as the module name.
