

Banner Message Guide

Banner messages are user defined messages which will appear in a banner at the bottom of each screen within the Front End of the platform when enabled. They are useful for clients who need to constantly display legal messages, copy right information, safety instructions, etc.

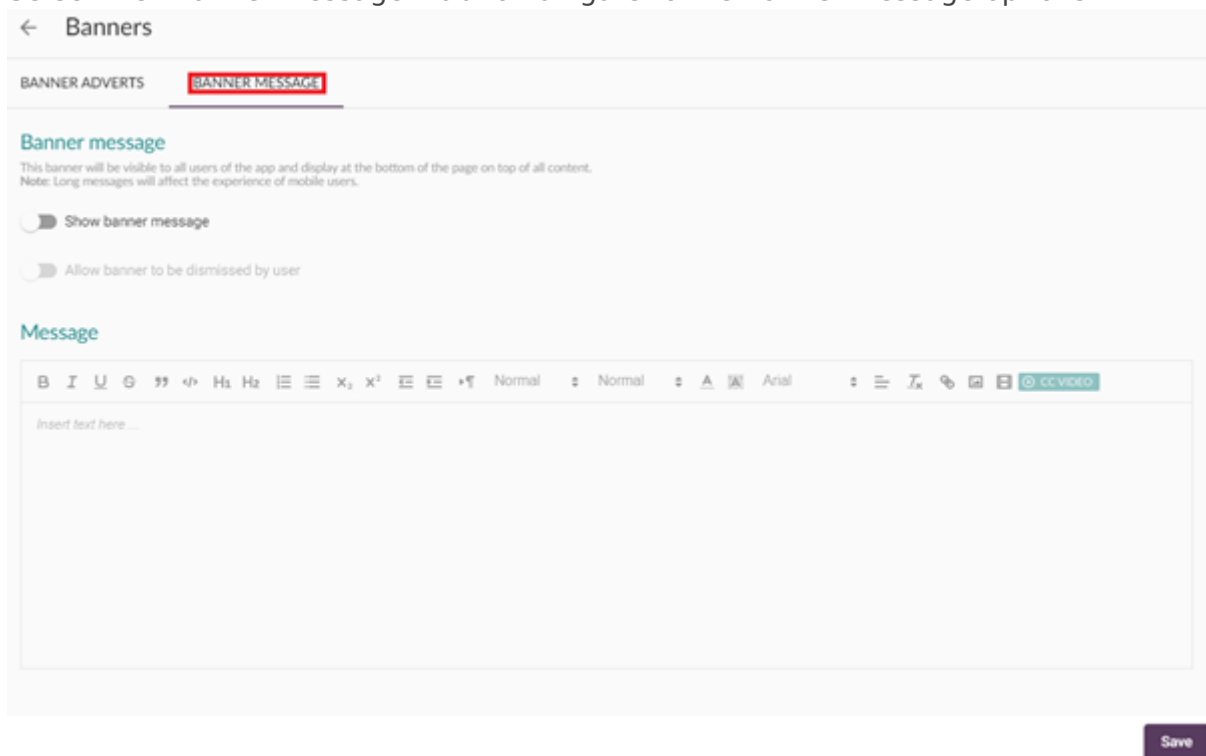

Banner Messages can be enabled and edited within the “Banner” settings within CMS which could potentially cause initial confusion as the Banner Adverts settings are also held there. Banner Adverts are the banners displayed on the Front End user navigation bar which disappear when the navigation bar is collapsed/not present and are independent of the Banner Messages.

Creating a Banner Message

1. To create a banner message on the Front End of the app, login to CMS, locate the app

2. Select the “Banner Message” tab to navigate to the Banner Message options.

3. To enable a banner message to appear on the Front End move the toggle bar to active for the “Show banner message”. This will allow the “Message” section to be editable.

Banner message

This banner will be visible to all users of the app and display at the bottom of the page on top of all content.
Note: Long messages will affect the experience of mobile users.

☒ Show banner message

- Using the “Message” box input any required text, images, files, etc. that you need to be displayed on every screen of the Front End.
- If you wish for the users to have the ability to dismiss the banner move the toggle bar to active for “Allow banner to be dismissed by user”. This will generate a “Dismiss” button on the banner, which when selected will remove the banner from all modules on the Front End until next login.

Banner message

This banner will be visible to all users of the app and display at the bottom of the page on top of all content.
Note: Long messages will affect the experience of mobile users.

☒ Show banner message

☒ Allow banner to be dismissed by user

- When you are happy with content of your banner message click on the “save” button. A banner will briefly display providing confirmation your changes have been saved successfully.

Your banner message configuration has been saved successfully.

Validating a Banner Message has been Created

- Login to the Front-End application and you will see the Banner message displayed at the bottom of each module using the same colour defined within the Branding for the Accent and Text on Accent. If applicable a button to “Dismiss” the banner is present.
