

Favouriting Sessions (Creating Personal Agenda)

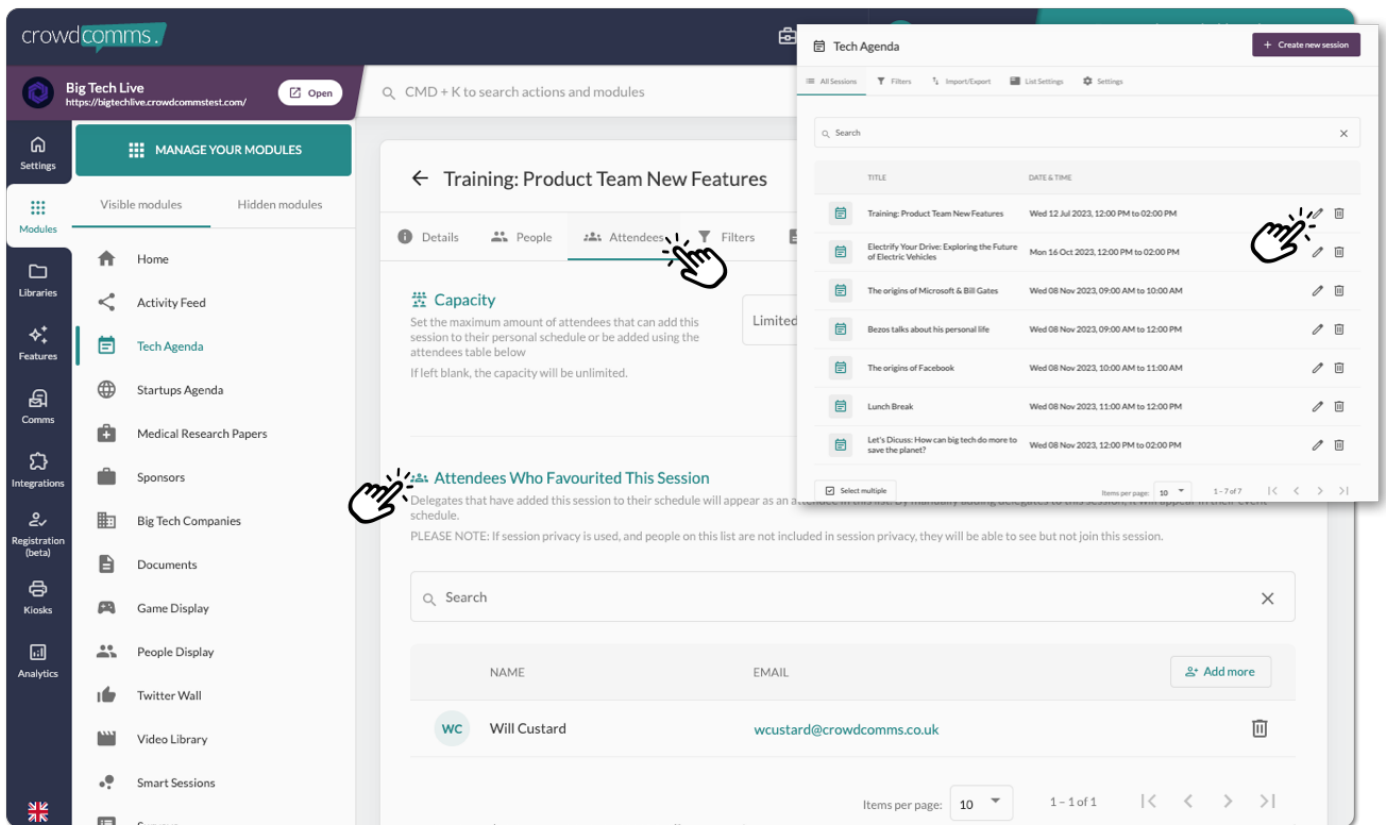

In contrast to [Managed Schedules](#), attendees can 'favourite' a session by clicking the star icon next to a session in the app agenda view. This will add the session to the attendee's event schedule on the app, allowing them to plan which sessions they wish to attend during the course of the event.

Other than the users, the admin is also able to add users to the session's favourite list via the CMS. The users can remove the session from their event schedule, regardless of whether the session by added themselves or an admin adds it for them.

The screenshot displays the crowdcomms CMS interface. On the left is a sidebar with navigation options: Home, Activity Feed, Tech Agenda, Startups Agenda, Medical Research Papers, Sponsors, Big Tech Companies, Documents, Game Display, People Display, Twitter Wall, Video Library, and Smart Sessions. The main content area is titled 'Training: Product Team New Features' and includes tabs for Details, People, Attendees, and Filters. The 'Attendees' tab is active, showing a table of attendees who have favourited the session. A hand icon points to the 'Attendees' tab, and another hand icon points to the star icon next to the session title in the 'Tech Agenda' sidebar. The table lists attendees with their names and emails, and an 'Add more' button is visible. Below the table, there is a search bar and a pagination indicator showing '1 - 1 of 1'.

You can export the current list of 'favourited' sessions from the 'Import/Export' tab of the agenda module on the CMS, allowing you to get an idea of how popular sessions are and allow for planning capacity.

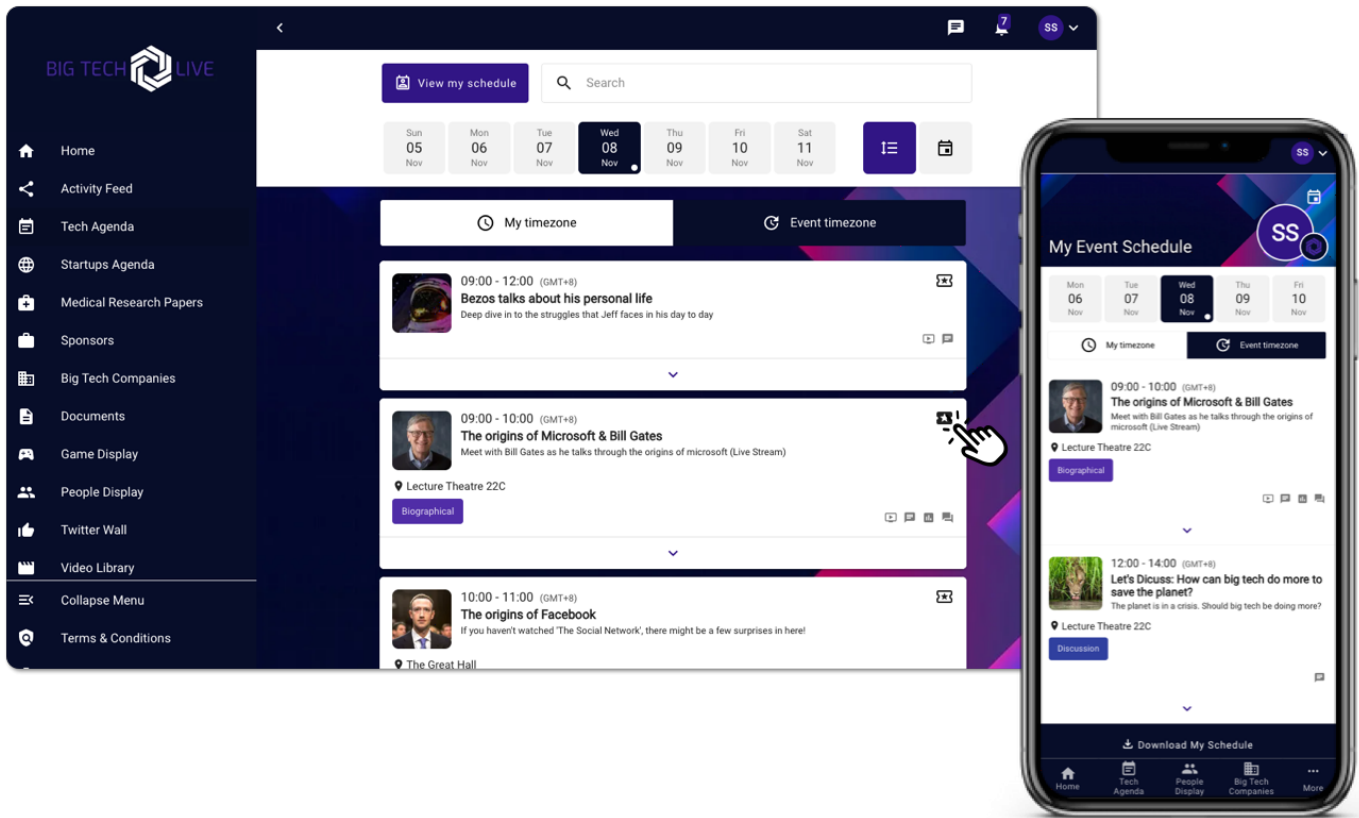

In App

As an app user, it's possible to favourite sessions within an agenda. To do this, tap the "star" icon when in an agenda list view. You can also favourite a session when inside the session page, just click the "Add to my Agenda" button situated at the top right corner of the engagements section of the session page.

To view all the sessions you've favourited, click on the right-hand menu of the app and choose "My Event Schedule". You'll then see all the sessions within the app that you've personally favourited, as well as (if applicable) sessions which have been added by the event organiser by way of the Managed Scheduled, so you can plan your time at the event.

It's also possible to add these favourited sessions to your device's calendar by pressing the download icon on this page.
