

Q&A

The Q&A response field is a valuable addition to the platform, providing users with a new level of longer-term interactivity and engagement. With this feature, users can ask specific questions related to the content and receive targeted responses that address their enquiries. We also simplified the 'Ask a Question' process down to one click!

Depending on how you wish to run your Q&A there are a variety of settings to enable you to tailor the function to your specific event. In the video below, we will take a look at how to approach this as well as exporting, moderation settings and more.

Revision #2
