

Privacy Policy

It's a requirement to include a privacy policy linked to the registration form to explain to those registering how you intend to use their data. Our default policy will be included to begin with, but it is an essential step to review this and make sure this covers your intended use of users data. You will need to update this to reflect how you are going to use peoples data before promoting registration.

The screenshot displays the CrowdComms dashboard interface. On the left, a dark sidebar contains a navigation menu with categories like Settings, Modules, Libraries, Features, Content, Communications, and Registration. The 'Privacy Policy' option under the 'Registration' category is highlighted with a red arrow. The main content area shows the 'Registration Privacy Policy' editor. At the top, a teal banner states: 'Terms & conditions and a privacy policy help your clients better understand how their data is being handled, as well as ensuring you remain compliant when collecting users' data.' Below this, the 'Terms & Conditions' section is visible, containing a rich text editor with a toolbar and a text area. The text in the editor describes the data processing policies of CrowdComms, mentioning GDPR and UK Data Protection Act 2018, and details about data collection, processing, and storage. The interface also includes a top navigation bar with user information and a search bar.

On the registration form, the privacy policy will be accessible as shown below:
