

# Registration options

## Registration Light:

Perfect if you're looking for a simple, on brand solution to capture attendee details and provide confirmation emails. [Read more](#)

## Registration, payments, ticketing and content pages:

If you're looking to promote various aspects of your event at the registration stage, drive up ticket sales, this option is the recommended package. Talk to your account manager who will scope out your exact requirements to ensure we price and support you to achieve all registration goals. [View demo](#)

## Integration options:

The CrowdComms platform integrates with a number of widely used registration platforms. Setup is quick and easy, however support is on hand to help you where needed.

- Aventri
- Cvent
- Eventboost
- Eventbrite
- Eventsforce
- idloom
- Typeform
- Explore our [public api](#) to setup your own integration

## Manual import / export:

If your preferred provider isn't currently on the list of those we integrate with, talk with your account manager. An integration may already be on our roadmap and for popular requests, we can schedule future integrations. For more bespoke solutions we also offer a public api to enable you to setup your own integration.

In the meantime we have a straight forward solution for those we don't integrate with. Simply export the data from your registration provider and import into our platform. Support will be on hand to help with this and we offer managed services for the entire process if preferable. [Read more](#)
